future City COMPETITION

NEW YORK (ALBANY)

Q & A BRAINSTORMING

Q&A Brainstorming

Engineering & Technology
What types of engineers were involved in designing your City? How did the engineering design process help you create and develop your Future City?

Teamwork & Project Management
How did your team decide how to divide responsibilities? Did any of your team's initial goals evolve as you worked on your project?

Farm to Table
How did the principles of circular economy or regenerative agriculture shape your team's food waste solutions? What innovative or futuristic technologies or materials are used in your city to prevent food waste along the food production pathway?

City Designs, Systems and Operations
How does your City support low-income or vulnerable residents? What factors did you consider while laying out the zones in your City? Are the zones separate or mixed-use?

Collaboration
Can everyone on the project team answer all questions about your City and Model? Can the presenters rotate answering questions?

Use of Model
Does your model align with your answers to the above questions? Can you provide examples from your model to answer questions?
