

CAPITAL DISTRICT FUTURE CITY® COMPETITION

2018-2019 Sponsorship Program

future City
COMPETITION

What is the Future City® Competition?

The Capital District Future City Competition is an educational program for middle school students to use their creative, innovative imaginations to design a city of the future. The students work with their teacher coach and an engineer-volunteer mentor from the community to design and build the city. The students apply math, science, engineering and technology, as well as enhance their writing and presentation skills, through this project.

Through the September to January program, 6th, 7th, and 8th grade students work in teams to apply their imaginations and early engineering skills in math, science, and technology to design a realistic city of the future. With the guidance of their teacher and engineering mentor they will:

1. Follow the engineering design methodology
2. Develop a Project Plan
3. Design their city using SimCity™ software
4. Research and write an essay on this year's topic
5. Build a 3-D model of their city
6. Present their city on competition day

**We need your help to offer this
program to our local students!**
