

How to Make a Future City Video Presentation

Teams will record an (up to) 7-minute video that presents their future city and solutions to the Living on the Moon challenge.

Keep in Mind:

- Scores are based on content rather than production. A more expensive or professionally produced video won't earn points based solely on production!
- Review the deliverable requirements and rubric with your team to ensure you meet the content expectations.
- Visual aids such as greenscreens, background images, or slideshow images can be used.
- Only the three team presenters can appear in the video.
- Make sure the audio for each presenter is clear and audible.
- Regardless of the chosen format, teams can deliver their presentation as if they were in a room with the judges or they may choose a more narrative/sketch structure where they move around, enter and exit the screen, etc.

Example Formats:

This list is not exclusive. Other formats are allowed as long as they follow all rules and requirements. If you have questions about the City Video Presentation, please check the rules or email Info@FutureCity.org.

Example 1 – Zoom, Google, or similar video chat platform:

If your students are socially distancing, you might choose to record your three presenters during a video chat.

Model segments or other visual aids can be held up to the camera by the presenters.

Many platforms have mobile apps. If a presenter doesn't have access to a computer with a webcam, they may be able to record on a cell phone.

Example 2 – Presenters together/One camera:

If your three presenters are physically together, you may choose to record them all at once. This can be done with any available tools (cellphone camera, computer webcam, etc.).

Example 3 – Record separately:

You may choose to have each presenter film themselves separately, then have a team member edit the segments into one video. Remember that this editing needs to be done by a student member of the team (not an adult).
