

Lead a Team

The Educator's Role

Educators guide middle school team members through Future City, introducing concepts like city design and the engineering design process. The work is entirely student-led, but the educator keeps the team on track, uploads deliverables, and offers feedback and guidance.

A VIRTUAL option this year!

The work of Future City can be done by teams either in-person or virtually for the 2021-2022 program cycle.

Information on whether some parts of the competition will take place in-person will be announced later in the year.

What resources does DiscoverE provide?

- A Program Handbook that provides a step-by-step guide to success with Future City
- Downloadable activities and resources
- Webinars featuring tips from longtime educators
- Detailed assessment rubrics
- Assistance from your local Regional Coordinator and Headquarters staff

Who Can Be a Team Educator?

Are you a classroom teacher or afterschool program leader? Do you lead a homeschool cohort, a church youth group, or a scout troop?

"Future City competition proves over and over again that engineering is creative, engineering is about meeting people and seeing places. It is a gift that keeps on giving. The children are transformed for life.

- Eleonora Straub, Future City Educator
& Regional Coordinator

Registration Details:

- \$25 registration fee per school/organization
