Sponsored by Greenman-Pedersen, Inc.

**What is the Future City[®]
Competition?**

The Capital District Future City Competition is an educational program for middle school students to use their creative, innovative imaginations to design a city of the future. The students work with their teacher coach and an engineer volunteer mentor from the community to design and build the city. The students apply math, science, engineering, and technology, as well as enhance their writing and presentation skills, through this project.

Through the September to January program, 6th, 7th, and 8th grade students work in teams to apply their imaginations and early engineering skills to design a realistic city of the future. With the guidance of their teacher and engineering mentor they will:

1. Follow the engineering design methodology.
2. Develop a Project Plan.
3. Research and write an essay on this year's topic.
4. Build a 3-D model of their city.
5. Present their city and solution to this year's challenge.
6. Participate in a virtual Q&A session.

This Year's Essay Topic:

"Fire Resilient Future"

This year, teams will design a resilient future city that can prevent urban wildfires, protect communities from their impacts, and recover quickly afterwards.
